

ROLE-ALIGNED RESUME

Russell Dudek

Operations & Technology Leader | AI Reliability, Observability, Governance & High-Consequence Systems

Pittsburgh, Pennsylvania | Candidate vision: index.html

Executive profile. Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Career evidence spans AI-first operations, telemetry-to-action loops, high-reliability engineering, 24/7 fulfillment, quality systems, and governed AI workflow design.

ROLE-ALIGNED CAPABILITIES

Production reliability systems	Telemetry & observability	AI governance & evaluation
Cross-functional operating models	Quality systems & root cause	Incident escalation & standard work
Change adoption & training	Technical-business translation	Platform value & reuse thinking

SELECTED LEADERSHIP EXPERIENCE

Vape-Jet - Director of Operations

2025-Present

AI-first operating transformation / software-enabled robotics & machine vision

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Amazon - Operations Management / Site Leader

2014-2018

24/7 operating mechanisms / launch / customer-backward execution

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics - Director of Operations and Engineering Management

2000-2013

High-reliability engineering / manufacturing / quality / technical programs

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

TECHNICAL FOUNDATION

TOOLKIT

Agentic AI; LLM and RAG patterns; human-in-the-loop design; Python; SQL; JavaScript; TensorFlow; Tableau; ERP/Odoo; Jira; Confluence; HubSpot; Slack; GIS.

EDUCATION

University of Pittsburgh, Bachelor of Science.
Materials science, physical chemistry, and biology-related grounding.

CREDENTIALS

IBM Enterprise Design Thinking Practitioner; Six Sigma Certification; OSHA 10.

RELIABILITY TRANSFER MAP

High-reliability controls

Compunetics: release evidence, process controls, root cause, and consequence-aware quality.

24/7 operating cadence

Amazon: signal visibility, standard work, escalation, recovery, and customer-backward priorities.

Telemetry into action

Vape-Jet: machine, customer, support, engineering, and operating signals converted into accountable work.

RUSSELL DUDEK / CONTINUED

AI operating models, technical depth, and adjacent evidence

AI & AUTOMATION ADVISORY

DudeWorth - Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.
- Develops Core and DudexOS concepts as agentic operating models.

COMPLEMENTARY OPERATING EVIDENCE

Cardinal Building Products - Regional Director

2021-2023

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

LEADERSHIP THROUGH-LINE

Enviro Social Capital - Chairman of the Board, 2014-2017. Co-founded and led a public-private impact initiative and helped shape a \$200 million Social Impact Bond feasibility concept.

IEEE - CMPT and EDS Pittsburgh Chapter Chair, 2012-2016. Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

OPERATING THESIS FOR SOUTHERN GLAZER'S

Production AI earns scale when ownership, release evidence, live observability, intervention rights, business outcomes, and learning are explicit enough to make decisions fast and auditable.

Evidence-integrity boundary.

This resume does not claim seven years of ML platform operations, four years leading that exact function, or an unverified computing/electronics degree equivalence. Concept work remains labeled as concept. The candidacy is a transparent transferability argument around reliability and operating-system leadership.

LOCATION CONSTRAINT

The posting requires residence near Miramar or Dallas. Russell's verified location is Pittsburgh; no relocation intent is implied.
