

CANDIDATE OPERATING ARTIFACT / DISCOVERY TEMPLATE

Model Reliability Contract

A one-page contract connecting release evidence, live boundaries, intervention rights, and business outcomes.

1 / Intent & business owner

Decision or workflow influenced:

Business outcome and owner:

Human authority retained:

	Platform / service owner:	Data owner:
ce bounds:	Drift / data-health bounds:	Latency / availability / freshness:

3 / Release evidence

Evidence	Status / link	Approver / date
Reproducible model and versioned dependencies		
Evaluation against agreed technical and business criteria		
Data readiness, lineage, and contract checks		
Security, compliance, and risk evidence		
Observability, alert routing, rollback, and fallback readiness		

	Retrain:	Rollback / fallback:
	Decision & owner:	Action / outcome:

Candidate hypothesis for discovery, not a claim about Southern Glazer’s current internal process or tooling.
