

ROLE-ALIGNED RESUME / SOUTHERN GLAZER'S AI/ML PRODUCT OPERATIONS

Russell Dudek

Operations & Technology Leader | AI Reliability, Observability, Governance & High-Consequence Systems

Pittsburgh, Pennsylvania | Candidate vision: russelldudek.github.io/Glazer/

Executive profile

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Career evidence spans AI-first operations, telemetry-to-action loops, high-reliability engineering, 24/7 fulfillment, quality systems, and governed AI workflow design.

Production reliability systems	Telemetry & observability	AI governance & evaluation
Cross-functional operating models	Quality systems & root cause	Incident escalation & standard work
Change adoption & training	Technical-business translation	Platform value & reuse thinking

Selected leadership experience

Vape-Jet - Director of Operations

2025-Present | AI-first transformation / robotics & machine vision

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Amazon - Operations Management / Site Leader

2014-2018 | 24/7 mechanisms / launch / customer-backward execution

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement; contributed to Prime Air research and Amazon Flex geolocation concepts.

Compunetics - Director of Operations and Engineering Management

2000-2013 | High-reliability engineering / manufacturing / quality

- Progressed through R&D; program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.

Technical foundation

Toolkit Agentic AI; LLM and RAG patterns; human-in-the-loop design; Python; SQL; JavaScript; TensorFlow; Tableau; ERP/Odoo; Jira; Confluence; HubSpot; Slack; GIS.	
Education University of Pittsburgh - Bachelor of Science. Materials science, physical chemistry, and biology-related grounding.	Credentials IBM Enterprise Design Thinking Practitioner; Six Sigma Certification; OSHA 10.

RUSSELL DUDEK / CONTINUED

AI operating models, technical depth, and adjacent evidence

AI & automation advisory

DudeWorth - Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.
- Develops Core and DudexOS concepts as agentic operating models.

Complementary operating experience

Cardinal Building Products - Regional Director

2021-2023

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu - Chief Pilot, Autonomous Systems & Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Enviro Social Capital - Chairman of the Board

2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

IEEE - CMPT and EDS Pittsburgh Chapter Chair

2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

Transferability to the mandate

Reliability mechanisms	Compunetics quality systems and Amazon 24/7 operating controls.
Observability to action	Vape-Jet factory, field, customer, support, engineering, and machine-fleet signal loops.
Governed AI workflows	DudeWorth evaluation, human judgment, escalation, decision records, adoption, and reuse frameworks.
Consequence and trust	High-reliability electronics and regulated autonomous operations.

Fit statement. My evidence supports leadership in reliability mechanisms, observability-to-action loops, high-consequence operations, quality controls, AI governance, and change adoption. It does not establish seven years of ML platform operations. I would not present it otherwise.
